KPIED at 57th Annual Day Celebrated by Indian Drug Manufacturer's Association (IDMA) in Mumbai.

Technology, innovation and entrepreneurship in healthcare- insights and learnings:

Mar 22, 2019: Indian Drugs Annual Day 2019 was the ideal gathering to meet and discuss challenges faced, and the gaps that need be bridged with cooperation of industry and academia. Discussion spanned across topics relevant to industry and academia including Indian Research Quality and Achievements, Role of Technology in Drug Development, New Target Developments, Disease burden in India and drug development, Government policies to support new class of Phytopharmaceuticals.

While continuing to build on traditional and fundamental research, the need of the hour is also devote time to drug developments with advancements in technology. Pharmaceuticals or Healthcare is no longer patient care but also Intelligent care- Artificial intelligence (AI). AI in healthcare not only helps patients to comply with dose and therapies but also helps medical health providers to monitor and asses progress of patients with real time data.

KPIED with its strong industry backed experience and researched brought its value to the table.

“Role of Innovation for Indian Pharma R&D”.
